Condition: New. Publisher/Verlag: Presses Académiques Francophones | Méthode d intégration énergétique pour la rétro-installation des systèmes industriels | L augmentation rapide de la création de richesses ces dernières décennies a suscité le besoin d améliorer la gestion des ressources naturelles et d accroître l efficacité de la production industrielle. Cet ouvrage présente une nouvelle approche pour l intégration énergétique, nommée " méthode pontale ", dans laquelle le processus fondamental de réduction de la consommation d énergie est pour la première fois rendu explicite. La méthode pontale inclut la définition du " pont ", qui est un ensemble de modifications conduisant à une réduction de la consommation d énergie. Il est prouvé que seulement un pont peut réduire la consommation d énergie. La méthode pontale inclut également une procédure pour énumérer les ponts de façon systématique, une " table de réseau " pour l évaluation facile de ceux-ci, et un " diagramme de transfert d énergie " permettant de visualiser les deux premiers principes de la thermodynamique dans un procédé et identifier l ensemble des opportunités énergétiques. La méthode peut être utilisée pour l intégration globale à l échelle du site industriel. Ce livre intéressera les chercheurs et les ingénieurs impliqués dans l analyse énergétique des procédés. | Format: Paperback | Language/Sprache: fre | 172 pp.
