By Max Weber

Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm.

Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1908 edition.

Excerpt: .beginning their development as a small black spot situated near the apex, but we find it more in the neighbourhood of the crest than of the apex of the tentillum. This shows probably that the tentillum is not a full-grown one. The bourrelet de nematocystes in Bedot's Erenna Richardi is the proximal part of the granulated crest, which does not stand in connection with the entodermal canal of the middle-part. In our largest tentillum we find it on the contrary near the basal part; near the peduncle of the tentillum. Perhaps such another bourrelet is being developed in later stages. Microscopical sections have been made but the material is unfortunately absolutely insufficient, the different layers being all destroyed. We can therefore give no further description of the very interesting entodermal canals and paired organs which Bedot describes, nor of the cellules transparentes and...

Reviews

This composed ebook is wonderful. It really is written in basic words rather than hard to understand. You may like the way the writer composes this pdf.
-- Ryder Nolan

This book can be well worth a go through, and a lot better than other. It is written in simple words and phrases and not confusing. It has been printed in an exceptionally simple way in fact it is merely right after I finished reading through this pdf by which basically changed me, modify the way I think.
