Forgotten Books, 2018. Hardback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Rural Highway Pavements, Maintenance and Reconstruction: A Discussion of General Principles Illustrated by Current and Recommended Practice This book is the second of a series of volumes presenting the road problem from the standpoint of the constructing engineer. It completes the text book portion of the series. This volume contains basic data ordinarily used in the design, construction, maintenance and reconstrue tion of rural highways. The object of this book is to emphasize and illustrate the application of well recognized engineering principles which have been more or less befogged by non-technical propaganda. The method adopted includes development of tentative theory illustrated by typical reports covering the usual problems. Specific. Examples of actual practice are given throughout the text showing that if advantage is taken of the technical knowledge of engineers in connection with design and type selection, the mileage of programs can often be increased at least 10 per cent over what is actually obtained under a system of rigidly standardized and stereotyped design. Furthermore if legislatures will have foresight enough to follow engineering advice in raising funds for maintenance and...
