By Carlos de la Guardia

Shroff Publishers/Packt, 2010. Softcover. Condition: New. Create flexible, agile web applications using the power of Grok--a Python web framework Develop efficient and powerful web applications and web sites from start to finish using Grok, which is based on Zope 3 Integrate your applications or web sites with relational databases easily Extend your applications using the power of the Zope Toolkit Easy-to-follow and packed with practical, working code with clear explanations In Detail Python is a very popular language for web application development. It`s easy to learn and powerful enough to program any kind of system. There are many options for Python web development frameworks, from lightweight packages to everything-and-the-kitchen sink solutions. However, Grok offers a solid foundation for developing powerful, extensible, and secure web applications without too much complexity. This is because it is based on a very advanced object-oriented web framework: Zope 3. Grok enables web developers to tap into the power of Zope 3, thus giving a range of useful features for our applications with very little code. This book offers Python developers a comprehensive understanding of Grok and a look at its main features by way of developing and evolving a sample application from concept to deployment...
