

Data Smart: Using Data Science to Transform Information into Insight

Filesize: 2.33 MB

Reviews

A whole new eBook with a brand new point of view. It is definitely simplistic but shocks in the 50 percent of the publication. I am just pleased to explain how this is the greatest ebook i have read during my very own daily life and could be he best ebook for possibly.
(Mitchell Kuhn III)

DATA SMART: USING DATA SCIENCE TO TRANSFORM INFORMATION INTO INSIGHT

To save **Data Smart: Using Data Science to Transform Information into Insight** eBook, remember to refer to the web link below and save the file or gain access to additional information which are have conjunction with DATA SMART: USING DATA SCIENCE TO TRANSFORM INFORMATION INTO INSIGHT ebook.

John Wiley Sons Inc, United States, 2013. Paperback. Book Condition: New. 1. Auflage. 231 x 185 mm. Language: English . Brand New Book. Data Science gets thrown around in the press like it s magic. Major retailers are predicting everything from when their customers are pregnant to when they want a new pair of Chuck Taylors. It s a brave new world where seemingly meaningless data can be transformed into valuable insight to drive smart business decisions. But how does one exactly do data science? Do you have to hire one of these priests of the dark arts, the data scientist, to extract this gold from your data? Nope. Data science is little more than using straight-forward steps to process raw data into actionable insight. And in Data Smart, author and data scientist John Foreman will show you how that s done within the familiar environment of a spreadsheet. Why a spreadsheet? It s comfortable! You get to look at the data every step of the way, building confidence as you learn the tricks of the trade. Plus, spreadsheets are a vendor-neutral place to learn data science without the hype. But don t let the Excel sheets fool you. This is a book for those serious about learning the analytic techniques, the math and the magic, behind big data. Each chapter will cover a different technique in a spreadsheet so you can follow along: * Mathematical optimization, including non-linear programming and genetic algorithms * Clustering via k-means, spherical k-means, and graph modularity * Data mining in graphs, such as outlier detection * Supervised AI through logistic regression, ensemble models, and bag-of-words models * Forecasting, seasonal adjustments, and prediction intervals through monte carlo simulation * Moving from spreadsheets into the R programming language You get your hands dirty as you work...
