

Twentieth-Century Science, Seven-Volume Set

By Alfred B. Bortz, Arthur Greenberg, Christina Reed, Kristine C. Harper, Marianne J. Dyson, Peter Haugen

Viva Books Private Limited, 2010. Hardcover. Book Condition: New. First edition. Twentieth-Century Science is a seven-volume set that explores, decade by decade, how science developed throughout the 20th century and examines the paths science may take during the 21st century. Designed to complement science curricula, the books are a fascinating narrative of the recent advances in science and technology and their far-reaching influence. **Biology Decade by Decade** chronicles the history of this scientific discipline from 1901, documenting the significant discoveries of the 20th century by notable biologists and others in the sciences. The volume covers the following: ? genetics ? chemical bonds and molecular structure ? war-driven research ? microbiology ? evolutionary science ? DNA ? crystallography ? HIV and AIDS ? penicillin ? stem cell research Each chapter in **Biology** features milestones of significant events, sidebars that clarify scientific concepts, a "Scientist of the Decade" essay that focuses on a notable individual or event, and a list of print and Internet resources reflecting the time period. The book includes more than 80 photographs and line illustrations, a conclusion that looks at 21st-century issues, an appendix of Nobel Prize winners in biology, a glossary, a list of general print...
