

## Exploitation of Saccharum spontaneum for Cellulase Production

Filesize: 1.48 MB

### **Reviews**

*An extremely wonderful publication with lucid and perfect reasons. It typically will not expense too much. You are going to like the way the blogger compose this publication.*  
(Prof. Maya Hand)

## EXPLOITATION OF SACCHARUM SPONTANEUM FOR CELLULASE PRODUCTION

To read **Exploitation of Saccharum spontaneum for Cellulase Production** PDF, remember to click the button listed below and save the file or have accessibility to additional information that are in conjunction with EXPLOITATION OF SACCHARUM SPONTANEUM FOR CELLULASE PRODUCTION ebook.

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Production, partial purification and characterization of cellulase produced by Bacillus species | Lignocellulosic biomass is a renewable and abundant resource with great potential for bioconversion to value-added bioproducts like enzymes. Cellulase is the potential industrial enzyme because of its utility in many tremendous industries and bioconversion of lignocellulosics into soluble sugars. Saccharum spontaneum has low lignin content as compared to cellulose and hemicellulose so it is a potential source for cellulase production. Pretreatment methods removes lignin from lignocellulose structure and also these methods can hydrolyze part of the hemicellulose and increases the enzyme accessibility to cellulose. My research efforts have been aimed in low cost, augmented cellulase production by using pretreated Saccharum spontaneum and optimization of fermentation process using cellulolytic Bacillus species. | Format: Paperback | Language/Sprache: english | 124 pp.
