Considering the Quebec curve alone, one is struck by the large number of very high rates. The variation is from one half of one mill, on the one side, to seventy mills on the other, a difference of 14,000 per cent. The lower quartile is 4.54, and the upper 1 The actual mean for Ontario is slightly lower than that in Table XIX, but not more than 1/10of a mill. This is because about 130 municipalities exempt less property for school than for general purposes, and this was not considered in working out the rates. quartile is 10.76. As half the variates lie within these points, it is seen that of the half of the cases most alike, the highest is 134 per cent above the lowest. Obviously also, one quarter of all the municipalities have a rate below the lower quartile, 4.54 mills, and the...
