Network18 Publications Limited, New Delhi, India, 2011. Hardcover. Book Condition: New. After witnessing the phenomenal rise in the prices of stocks over the years, despite large and small dips in between, it is now commonly accepted that the stock market is the best place to enable one's fortunes to grow. But what is less accepted is that 'it is not complicated'. There are many people who simply refrain from investing because they are afraid of the jargon that they hear. Others are cautious because of the stories of losses, meted out by the market, which are floating around. Still others are just not in the market because they lack the time that needs to be invested in understanding the markets. This book is part of an initiative to educate investors who are sitting on the sidelines, wondering whether they should invest in stocks and how they should go about it if they do. It covers everything from financial planning and asset allocation to the steps that will launch you into equity trading and the process involved in purchasing shares through an IPO. It introduces you to techniques that will help you select stocks - such as the top down approach and the bottom up approach - and explains how you can undertake fundamental analysis and use technical analysis. It even instructs you on how to calculate the taxes that are applicable when you invest or disinvest in stocks. Last but not the least, it tells you how you can arrive at the absolute returns on your stock holdings and reminds you about the importance of reviewing your portfolio from time to time. Written in simple language, devoid of scary 'financial jargon', this book is easy to read yet immensely educative. It is liberally sprinkled with amusing and informative pictorials and...
