SYNTHESIS OF DOPED LITHIUM ALUMINATE NANOCRYSTALLINE POWDERS

Miriam Betty Lincoln
Synthesis of Doped Lithium
Aluminate Nanocrystalline
Powders
Lithium Aluminate Nanoparticles

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Lithium Aluminate Nanoparticles | The field of material sciences has advanced tremendously in the areas of synthesis of nanoparticles with altered properties. The main objective of this dissertation was to synthesis doped Lithium aluminate (LiAlO_2) nanocrystalline powders. In the present work these nanocrystalline powders were obtained by sol-gel method, and the powders were characterized for structural analysis with X -ray diffraction, SEM and EDAX. The particle size was found to be around 20nm...

Reviews

Good e book and useful one. I have got read and that i am confident that i will likely to go through once more again later on. It is extremely difficult to leave it before concluding, once you begin to read the book.

-- **Angela Blick**

An exceptional publication and also the typeface utilized was fascinating to learn. Better then never, though i am quite late in start reading this one. You will not really feel monotony at at any time of your time (that's what catalogs are for concerning if you ask me).

-- **Thea Lind**

A whole new electronic book with a new point of view. It can be full of knowledge and wisdom Its been written in an exceedingly simple way which is only following i finished reading through this pdf in which really modified me, modify the way in my opinion.
