HarperCollins Publishers Inc, United States, 2005. Paperback. Condition: New. Reprint. Language: English . Brand New Book. Set against the backdrop of the witchcraft trial of his mother, this lively biography of Johannes Kepler - the Protestant Galileo and 16th century mathematician and astronomer - reveals the surprisingly spiritual nature of the quest of early modern science. In the style of Dava Sobel s *Galileo s Daughter*, Connor s book brings to life the tidal forces of Reformation, Counter-Reformation, and social upheaval. Johannes Kepler, who discovered the three basic laws of planetary motion, was persecuted for his support of the Copernican system. After a neighbour accused his mother of witchcraft, Kepler quit his post as the Imperial mathematician to defend her. James Connor tells Kepler s story as a pilgrimage, a spiritual journey into the modern world through war and disease and terrible injustice, a journey reflected in the evolution of Kepler s geometrical model of the cosmos into a musical model, harmony into greater harmony. The leitmotif of the witch trial adds a third dimension to Kepler s biography by setting his personal life within his own times. The acts of this trial, including Kepler s letters and the accounts of the witnesses, although published in their original German dialects, had never before been translated into English. Echoing some of Dava Sobel s work for *Galileo s Daughter*, Connor has translated the witch trial documents into English. With a great respect for the history of these times and the life of this man, Connor s accessible story illuminates the life of Kepler, the man of science, but also Kepler, a man of uncommon faith and vision.
