Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from The Block System of Signaling on American Railroads: The Methods and Appliances Used in Manual and Automatic Block Signaling The student of block signaling encounters interlocking machines in use in America. In these descriptions, as in those of the mechanical features of block signaling, the purpose has been to show the methods of working, rather than details of material or construction. Signals and signal machinery have been developed by many different engineers and inventors, and the experience and studies of these men have been extensive and varied; so that the number of devices having merit is large. To adequately describe these, or even to outline the present state of the art, would require a treatise, and lead beyond the scope of this work. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
