Murach/Shroff Publishers & Distributors Pvt. Ltd., 2014. Softcover. Condition: New. 5th or later edition. If you know how to create Windows applications using C#, you`re ready for this latest edition of our classic web programming book. It will get you off to a fast start with web programming, no matter whether you`re coming to ASP NET 4.5 with a background in an earlier release of ASP NET, Java servlets/JSP, PHP.or with no web background at all. In fact, by the end of chapter 5, you`ll know how to use Visual Studio 2012 to develop and test multi-page database applications for the web. But this book is much more than a beginning book. By the time you`re done, you`ll have the professional skills you need to develop bullet-proof web applications for business. You`ll also find that this book does double duty as the best on-the-job reference book that money can buy. Everything you need to know to get going on web development Look at the table of contents, and you`ll see why we say that this book covers what you need to know to develop web applications at the professional level. That includes skills like: Managing state Validating input data Handling database data with SQL and object data sources, as well as with time-saving data controls like GridView, DetailsView, FormView, ListView, and DataPager Knowing how HTML5 and CSS3 fit into ASP NET applications, so you can tweak that code as needed Creating user-friendly sites with master pages, themes, and site navigation features Using friendly URLs that improve search engine results Handling common frustrations, like back-button refreshes, with ease Deploying web applications on a remote server Using ASP NET Ajax to create rich Internet applications (RIAs) Developing and consuming WCF and Web API services that can be hosted by one web server...
