Brand New Book ***** Print on Demand *****.Excerpt from Architectural Iron and Steel: And Its Application in the Construction of Buildings; Specification of Ironwork; Tables, Selected Expressly for This Work This work is intended for Architects, Architectural Students and Builders. The Author has been induced to prepare it because of his inability to find, among the many excellent works on the Mathematics of Construction, one that could be readily adapted as a reference book, treating of the various details of Iron and Steel as applied in the construction and finishing of buildings. It was considered advisable to give but general information on the manufacture of Iron in the first chapter, to serve as an introduction to the chapters on Construction which immediately follow, and to give in these chapters such simple formulae and complete tables as would readily enable one to calculate the strength of beams, girders, etc., subject to a transverse strain, and of vertical supports subject to compression. Desiring to give as much information as possible in relation to the construction and practical description of the miscellaneous details, especial attention has been...
