By Leon Barnes MD

Demos Medical Publishing. Hardcover. Condition: New. 216 pages. Dimensions: 10.9in. x 8.6in. x 0.7in. A Doodys Core Title 2012. The head and neck is the site of some of the most diverse and histologically complex tumors in the human body. Within this small, highly specialized region, one finds a remarkable range of tissues, including skin, mucosal surfaces, soft tissue, bone, lymph nodes, peripheral and central nervous system tissue, paraganglia, endocrine organs, salivary glands and odontogenic structures. Compounding the issue, biopsies are often small, frequently distorted and difficult to orient for paraffin embedding, all of which impact evaluation and diagnosis, even for experienced pathologists. Head and Neck Pathology presents fifty cases for discussion and illustration. The cases have been selected to show the wide range of specimens seen in head and neck pathology and address some of the frequent encountered in these lesions. The goal of this unique book is to provide detailed insight into a wealth of expert experience in such cases, with in-depth review of the experts analysis and diagnostic process supported by high-quality color photomicrographs and discussion of the diagnostic principles involved in evaluating these lesions. Head and Neck Pathology is essential reading for surgical pathologists, otolaryngologists and pathologists. In...
