EARLY LITERACY DEVELOPMENT IN DEAF CHILDREN (HARDBACK)

Oxford University Press, United Kingdom, 2015. Hardback. Condition: New. Language: English . Brand New Book. There is a robust body of knowledge suggesting that early language and literacy experiences significantly impact on future academic achievement. However, relatively little has been written with respect to the early literacy development and experiences of deaf children. In *Early Literacy Development in Deaf Children*, Connie Mayer and Beverly J. Trezek address this need by providing an in-depth exploration of how young deaf children learn to read and write, identifying the foundational knowledge, abilities, and skills that are fundamental to this process. They supply an overview of the latest research and present a model of early literacy development to guide their discussion on topics such as teaching reading and writing, curriculum and interventions, bilingualism, and assessment. Throughout, they describe the ways in which young learners with hearing loss are similar to, or different from, their hearing age peers and the consequent implications for research and practice. Their discussion is wide-reaching, as they focus on children from various cultural and linguistic backgrounds, those with additional disabilities and hearing losses ranging from mild to profound, and those using a range of communication modalities and amplification technologies, including cochlear implants. As advancements in hearing technologies have heightened both the emphasis on literacy development in the early years and the importance of these years in the ultimate development of age-appropriate reading and reading outcomes, this timely text addresses a topic that has thus far eluded the field.
