On animal electricity

By Augustus Desire Waller

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 30 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1897 Excerpt: . . . greatest effort of which the muscle is capable at the time, but each of which is a little greater than its predecessor. Such an increasing series is called a staircase, and we have seen that a series of electrical responses of nerve exhibits a similar staircase--increasing in the case of a series of negative effects, decreasing in the case of a series of positive effects or after-effects. Remembering that the characteristic effect of CO₂ from without, and presumably from within, is an augmentation of negative response and a diminution of positive response, we have no difficulty in admitting that the electrical staircase of nerve, whether ascending or descending, is brought about by carbonic acid evolved at each step in a series. It is pretty obviously a CO₂ phenomenon. Fig. 32 a. --Staircase of electrical responses of nerve. Staircase effect, then, is not confined to contractile tissue,...
