Brand New Book ***** Print on Demand *****.Excerpt from The Origin of the Feudal Land Tenure in Japan It is quite beyond the range of possibility, in an attempt to prove a certain sequence of social conditions and results, to try on a nation a series of experiments on a large scale which would require for their maturity circumstances of great and changing complexity extending over centuries. It must then be a matter of uncommon interest to the student of the history of human society to observe that Western Europe and Japan, with no mutual relation between them, independently evolved in the course of a long time those peculiarly definite and exhaustive social adjustments that are known as feudal, under conditions and upon principles which were, if significant in their minor differences, also striking in their extraordinary similarity in the main features. Human history, which so usually eludes a comparative study of its great divisions, becomes, under such circumstances, nearly comparable, and should therefore afford invaluable data to the scientific student of social evolution. The interest of the theme is enhanced, in the case of Japan, by the fact that she possesses a body of original sources sufficiently large to invite a careful investigation, and larger than may be offered by some of the other non-European nations that are said also to have known feudalism in their history. Following is a summary statement of some of the conclusions and problems of a study of the origin of the Japanese feudal land tenure on its purely institutional side.
