RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 52 pages. OCLC Number: 54801018 Excerpt: . . . The Author Lieutenant Colonel David J. Nicholls, USAF is a materials engineer with experience in resource analysis. Prior to entering the Air War College, he worked as an operations analyst for the Program Analysis and Evaluation Directorate within the Office of the Secretary of Defense. There he performed statutorily required cost estimates for major weapon systems such as the New Attack Submarine, the AIM-9X (Sidewinder) missile, the Joint Air to Surface Stand-off Missile (JASSM), and Tomahawk among others. He also performed economic technical analyses supporting Secretary of Defense decisions concerning thc Seawolf submarine, the Crusader howitzer, comparing SLAM-ER vice JASSM, the Defense Nuclear Agency, and the number of public shipyards used by the Navy. Previously, he served two tours at the Air Force Academy where he served as an Associate Professor and Director of the Applied Mechanics Laboratory. There he directed and taught courses in composite materials, metallurgy, failure analysis, strength of materials, and systems engineering design. Prior to assignment at the Academy, he worked as a development engineer at the Air Force Materials Laboratory. There, as part of in-house research, he established their in-house capability to fabricate specialized composite materials and developed their process for evaluating small amounts of composite matrix materials. He also conceived and managed research contracts for thermoplastic composites (later used heavily on the B-2) and cheap composite fabrication methods. His professional military education includes Squadron Officer School, distinguished graduate of the Air Command and Staff College, and Armed Forces Staff College. He earned a Bachelor of Science from Rensselaer Polytechnic Institute, a Master of Science from the University of Dayton, and a Doctor of Philosophy from the University...
