Excerpt from The Maritime Medical News, Vol. 18: A Monthly Journal Devoted to Medicine and Surgery; Nov. 1906 Some Remarks on Acute Ab dominal Pain, by C. M. H. Howell. In the first paper it is stated that in chronic pelvic dis orders the pain is generally in the iliac region, and is most com mon in cases in which acute pel vic peritonitis figures in the his. Tory. Ovarian pain is largely imaginary in many instances. It is not easy to differentiate the or igin of pain, especially on the right side. If due to uterine dis order, enlargement and displace ment of that organ can usually be determined; if due to endo metritis, it generally disappears after curettage. Certain points on the abdominal wall, corres ponding or contiguous to en trance of nerves into tissues, mav be usually tender and indicate disorder of ovaries, tubes, uter us, ect. Reviews

This publication is amazing. It is definitely basic but shocks in the fifty percent of your publication. You wont feel monotony at anytime of your own time (that's what catalogues are for concerning if you question me).
