Pages Number : 218 Publisher: Beijing Aerospace University Press Pub. Date :2009-04. Microcontroller Theory and Simulation Design is a vocational-oriented electronics. machinery and electronic and computer classes and other professional books written specifically for teaching . Scheduling for the contents of the vocational education characteristics. financial teaching. learning and doing as a whole. from the foundation started. extensive knowledge. example-rich. practical. especially through a large number of examples shows how to use Proteus SCM software to support its peripheral circuit co-simulation capabilities to the microcontroller teaching abstract principles has become so vivid to learn. easy work of teachers. but also easy for beginners to learn with hands-on microcontroller empowerment. Microcontroller Theory and simulation of design is divided into nine chapters: Chapter 1 to 3 single-chip microcontroller simulation software and hardware knowledge and the compiler uses Proteus. Chapters 4 and 5 introduce single-chip instruction and program design. 6 to 8 chapter describes the microcontroller timer counters. serial port and interrupt system. the composition and application of Chapter 9 focuses primarily on single-chip system expansion and peripheral interface applications. In addition to Chapter 1. the other chapters are at least equipped with a simulation example. to facilitate teachers in project-based teaching and student learning. Microcontroller Theory and Simulation Design re-based. targeted. material selection reasonable to explain the standards clear. both as a vocational college course materials SCM. SCM can also be supplied to the interested students and other non-professional learning. More Contents: Chapter 1 Overview 1.1 single-chip microcontroller basics 1.2mcs-51 series single-chip microcontroller applications Exercises 1.3 Introduction to Chapter 2 of the microcontroller simulation software Simulation software 2.2keiluvision3 2.1proteus 2.3 integrated development environment for instance light water design in Chapter 3 Exercises...
