

Computer Processing of Oriental Languages. Language Technology for the Knowledge-based Economy

Filesize: 5 MB

Reviews

Excellent electronic book and helpful one. It usually does not cost a lot of. I am quickly will get a pleasure of reading through a written publication.

(Bernardo Feeney Jr.)

Condition: New. Publisher/Verlag: Springer, Berlin | 22nd International Conference, ICCPOL 2009, Hong Kong, March 26-27, 2009. Proceedings | The International Conference on the Computer Processing of Oriental Languages (ICCPOL) series is hosted by the Chinese and Oriental Languages Society (COLCS), an international society founded in 1975. Recent ICCPOL events have been held in Hong Kong (1997), Tokushima, Japan (1999), Seoul, Korea (2001), Shenyang, China (2003) and Singapore (2006). This volume presents the proceedings of the 22nd International Conference on the Computer Processing of Oriental Languages (ICCPOL 2009) held in Hong Kong, March 26-27, 2009. We received 63 submissions and all the papers went through a blind review process by members of the Program Committee. After careful discussion, 25 of them were selected for oral presentation and 15 for poster presentation. The accepted papers covered a variety of topics in natural language processing and its applications, including word segmentation, phrase and term extraction, chunking and parsing, semantic labelling, opinion mining, ontology construction, machine translation, information extraction, document summarization and so on. On behalf of the Program Committee, we would like to thank all authors of submitted papers for their support. We wish to extend our appreciation to the Program Committee members and additional external reviewers for their tremendous effort and excellent reviews. We gratefully acknowledge the Organizing Committee and Publication Committee members for their generous contribution to the success of the conference. We also thank the Asian Federation of Natural Language Processing (AFNLP), the Department of Computing, The Hong Kong Polytechnic University, Hong Kong, the Department of Systems Engineering and Engineering Management, The Chinese University of Hong Kong, Hong Kong, and the Centre for Language Technology, Macquarie University, Australia for their valuable support. | Regular Papers.- A Density-Based Re-ranking Technique for Active Learning for Data Annotations.- CRF Models for Tamil Part of Speech Tagging and Chunking.- A Probabilistic Graphical Model for Recognizing NP Chunks in Texts.- Processing of Korean Natural Language Queries Using Local Grammars.- Improving the Performance of...
