

## North Sea and Channel Connectivity during the Late Iron Age and Roman Period (175/150 BC-AD 409) (Paperback)

By Francis M. Morris

British Archaeological Reports, United Kingdom, 2010. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. This is a major study of trade, exchange and economy in the maritime regions of northwest Europe during the Late Iron Age and Roman period (175/150 BC-AD 409). The study encompasses the regions of northwest Europe that were integrated into the Roman Empire, as well as those that lay in the Barbaricum, beyond the Empire's Rhine frontier. The author looks in detail at long-distance exchange goods, including: wine, olive oil and fish sauce amphorae; terra sigillata and pottery; coins; metals and metalwork; lava querns; building stone; glass; amber and agricultural products. Over 90 beautiful distribution maps and other figures are included. It is argued that three maritime exchange systems can be identified in the North Sea and Channel region: the Atlantic system; the Southern North Sea and Eastern Channel system and the Eastern North Sea system. These three systems can be distinguished from one another, though the first two in particular display considerable overlap. Geography is held to have played an important role in determining these systems and it is argued that they may endure across the longue durEe. The...
