General Books LLC. Paperback. Book Condition: New. This item is printed on demand. Paperback. 28 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1891. Excerpt: . . . COURSE OF STUDY FOR PRIMARY AND GRAMMAR SCHOOLS. ARITHMETIC. i1: --The teacher who would do to good advantage the work of any grade in this subject should study carefully the outlines for every other grade. As will be seen, an endeavor has been made to present the easv applications of number without reference to the traditional text book order of subjects. There is no educational reason why simple work in decimals should be deferred to the Fifth Grade, or why denominate numbers should be left until fractions are mastered. Under the plan here outlined the pupil will proceed from the easy to the more difficult practical applications of the arithmetic as he passes from grade to grade. Further, the pupil who is compelled to drop out of school before completing the grammar course will have mastered enough of the applications of arithmetic to prepare him for its use in business life. I. Develop objectively a thorough knowledge of numbers to 11. All additions, subtractions, multiplications and divisions possible within the limit of each number should be objectively taught the child. These objective presentations should be repeated until results are known independent of the objects, after which they should be laid aside. Seeleys or Soldans Manual of the Grube Method will prove a valuable aid. Teach no figures during the first year. Wherever possible, use objects from nature. The caps of the eucalyptus fruit, for example, will be found very convenient. Illustrate 2, pairs, yokes,...
