Reviews

This publication is wonderful. I have got study and so i am confident that i am going to likely to read once again once more down the road. Its been designed in an exceedingly straightforward way which is only soon after i finished reading this ebook by which actually altered me, change the way i think.

EXCAVATIONS IN EASTERN CRETE: SPHOUNGARAS (CLASSIC REPRINT) (PAPERBACK)

Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Excavations in Eastern Crete: Sphoungaras The Sphoungaras slope, like many other steep hillsides of Crete, had been stripped of most of its soil. In this process of denudation the higher parts of the hill had become quite bare except here and there where the slipping soil had found lodgment against a boulder, or just below the cliffs where the overhanging rock protected the earth below. Near the foot of the hill the deposit of earth was sufficient to cover the tall burial jars, although some of these lay only a few inches below the surface where, in View of the centuries during which this field had undergone cultivation, it seemed incredible that a plough had not reached them. The upper part of the hill had suffered not only from the denudation of its soil, but also from the falling of boulders from the cliffs, which had seemingly broken up whatever pottery had not already been washed down the hill. The number of potsherds strewn about the lower slope bore witness to the extent of the havoc. Thus, when in the course of the excavations the upper part of the slope was reached, the deposit of earth together with the ancient remains came abruptly to an end and we saw that the area where the soil was deep enough to make excavations possible was confined to a comparatively narrow belt. There were however these exceptions: just outside the cave which had been partially cleared by Mrs. Hawes, was found a considerable Early Minoan deposit (b on plan, Pl. XV); at the top of the hill between the cliff and some boulders (c on plan) were found three pithoi together with fragments...
