Excerpt from Save the Youngest: Seven Charts on Maternal and Infant Mortality, With Explanatory Comment The chart on page 9 should be read in connection with the chart on page 7. As explained on that chart, deaths in the first month of life are due chiefly to the unfavorable conditions surrounding the mother during pregnancy - conditions which include poverty, ignorance, venereal disease, and lack of medical and nursing care. This chart indicates plainly that the prenatal and natal causes claim the highest number of victims - a number closely corresponding to the deaths in the first month of life. If infant mortality is to be controlled the work for that purpose must begin in the prenatal period, and must include proper medical and nursing care for the mother at the time of childbirth.
