Sharp s life-long labours in the twin sciences of mathematics and astronomy; the important part he played in bringing the latter to a practical test by means of his inventive and mechanical genius; and the somewhat ambiguous nature of the account which had been given of his personal history, all seemed to call for such an account as would do justice to his genius and his works. Beyond detached notices of him, however, many of which are clearly traceable to a common origin, no Life of Sharp had been written, although nearly 150 years have elapsed since his decease, nor has justice been done to his ability and industry either by contemporary writers or by modern scientists. Fortunately, materials affording ample testimony of his title to rank even with contemporaries like Sir Isaac Newton, Dr. Halley, and Flamsteed, the first Astronomer-Royal, have come into the Author s hands, and the result appears in the present work.
