CYCLIC RENORMALIZATION AND AUTOMORPHISM GROUPS OF ROOTED TREES

Springer. Paperback. Condition: New. 174 pages. Dimensions: 9.2in. x 6.1in. x 0.5in. The theme of the monograph is an interplay between dynamical systems and group theory. The authors formalize and study cyclic renormalization, a phenomenon which appears naturally for some interval dynamical systems. A possibly infinite hierarchy of such renormalizations is naturally represented by a rooted tree, together with a spherically transitive automorphism; the infinite case corresponds to maps with an invariant Cantor set, a class of particular interest for its...
