Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Flow of Water in Open Channels: Pipes, Sewers, Conduits, C., With Tables, Based on the Formulae of D arcy, Kutter and Bazin The former formulae, however, though admitted to be more accurate, are also, as a rule, more complicated in form, and more troublesome and tedious in their application, than most of the old formulae in use. In these days, when numerous works on Sewerage, Water Supply, Irrigation, c., are being constructed in this country, and in fact all over the civilized world, hydraulic formulae are, perhaps, in more general use by Engineers than at any former time, and therefore, any ready method which combines rapidity with accuracy in the application of the new formula; will, very likely, tend to their more general use than at present. It is believed that this combination of rapidity with accuracy can be gained by the proper use of the tables in this book; and Hydraulic Engineers, who make it a practice to use the formulae of d arcy, Kutter and Bazin, and to whom a saving of time and tedious computation is an object, will find the tables of material help in the solution of problems relating to the flow of water in open and closed channels.
