

Accounting For Managers

By Collier, Paul M.

Book Condition: New. Publisher/Verlag: Wiley & Sons | Interpreting Accounting Information for Decision-Making | This updated and revised fourth edition of Accounting for Managers builds on the international success of the previous editions in explaining how accounting is used by non-financial managers. Emphasizing the interpretation rather than the construction of accounting information, Accounting for Managers encourages a critical, rather than an unthinking acceptance of accounting techniques. Whilst immensely valuable for planning, decision-making and control, users of accounting information need to recognize the assumptions behind, and the limitations of particular accounting techniques. As in the previous editions, Accounting for Managers links theory with practical examples and case studies drawn from real business situations across a wide range of manufacturing, retail and service industries. | Preface to the Fourth Edition xvii About the Author xxi Acknowledgements xxii PART I Context of Accounting 1 1 Introduction to Accounting 3 Accounting, accountability and the account 3 Introducing the functions of accounting 5 A short history of accounting 6 The role of financial accounting 7 The role of management accounting 8 Recent developments in accounting 10 The relationship between financial accounting and management accounting 12 A critical perspective 13 Conclusion 15 References 15 Questions 16 2...
