Next generation nanotechnology assembly fabrication methods: a trend forecast

By -

No binding. Book Condition: New. This item is printed on demand. Original publisher: Maxwell Air Force Base, Ala. : Center for Strategy and Technology, Air War College, Air University, 2008 OCLC Number: (OCoLC)255971062 Subject: Nanotechnology -- United States -- Forecasting. Excerpt: . . . transferred, and the patterns are etched to create devices. The limiting step is the pattern transfer. Non-optical methods of lithography are being pursued to overcome this size limitation. The lithographic process is arguably the key 23 enabling technology for the digital age. Lithography is used to pattern features of complex geometries as small as 50 nm with a remarkable level of perfection and placement (registration) with respect to the underlying substrate enabling hundreds of millions of devices to be fabricated on a single chip. But as the shrinking length scales continue, new imaging materials may be required to meet manufacturing constraints. These methods include block copolymer lithography, electron beam lithography, and nano-imprint 24 lithography. An entirely new, bottom-up architecture based on nano building blocks such as carbon nanotubes and semiconducting nanowires is being pursued by others. In this approach, nanoscale devices are constructed by direct, three-25 dimensional synthesis. Transistors are one such example. The...

Reviews

The most effective book i ever read through. it had been writtern quite flawlessly and valuable. I am just happy to let you know that here is the very best publication i have got read through during my individual daily life and may be he greatest pdf for ever.

-- Prof. Adonis Rodriguez

Comprehensive information for publication fans. I have got read and i am confident that i am going to likely to go through once again once again in the foreseeable future. I am just very happy to let you know that this is actually the greatest book i have read in my very own existence and could be he finest book for at any time.

-- Clair Windler
