Introduction to algorithm design. analysis and implementation of: C. C and Java Chapter 1 to Chapter 6 of the algorithm design skills into incremental type algorithms. divide-and-conquer algorithms. dynamic programming algorithm. greedy algorithm. backtracking algorithm and graph search algorithms. Algorithm is given to solve the problem for some of the classic problems of each chapter. and analyze the time complexity of the algorithm. So for beginners. divided in accordance with the design of the algorithm. the algorithm ideological exposition focused conducive Quick Start to understand the essence of the algorithm. Once with the basic algorithm design. divided into thematic depth learning applications. readers learn can combine together to solve complex problems. Chapter 7 of the book. linear programming. and Chapter 8 computational geometry synthesis algorithm part. by learning these contents. readers will learn further randomized algorithm to more cutting-edge modern algorithms. approximation algorithms and...
