Recent military engagements have seen a radical shift in adversary tactics. In addition to confronting traditional conventional forces, the US military now faces an increasing use of irregular warfare tactics to offset the US technological and operational advantages. Long, slow, and predictable supply convoys along overstretched lines of communication also tend to place US supplies and troops at significant risk. This is further complicated by a general lack of logistical infrastructure and increasing requirements for US forces to assume positions in isolated and rugged locations. The low likelihood of these trends changing in future engagements places the DOD in a difficult position. How do you increase cargo movement to isolated forward operating bases (FOB) in relatively inaccessible locations while maintaining secure lines of communication Operational and budgetary limitations coupled with tooth-to-tail ratio, shrinking force sizes, increasing logistical requirements, and deployment footprint concerns require immediate solutions, even if finding them means searching outside the box. This challenge dictates a movement away from traditional resupply means and an accompanying paradigm and doctrinal shift. Advancements in technology, increased needs, and shrinking...
