in WiMAX
Channel Allocation in WiMAX

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Channel Allocation in WiMAX | Over last few years use of wireless broadband has increased rapidly. There are two types of wireless broadband users, fixed and mobile. WiMAX is a new technology in 3G systems (near to 4G) and has support for wireless broadband users, both fixed and mobile. For fixed users (Mainly Office and Home) dis-connectivity in the connection is intolerable. Such users are needed to be allocated permanent channels, so...
