FEMINIST POLITICS & HUMAN NATURE

MD Publications Pvt Ltd, New Delhi, 2011. Soft cover. Condition: New. 243pp., Feminism is both an intellectual commitment and a political movement that seeks justice for women and the end of sexism in all forms. However, there are many different kinds of feminism. Feminists disagree about what sexism consists in, and what exactly ought to be done about it; they disagree about what it means to be a woman or a man and what social and political implications gender has or should have. Nonetheless, motivated by the quest for social justice, feminist inquiry provides a wide range of perspectives on social, cultural, and political phenomena. Important topics for feminist theory and politics include: the body, class and work, disability, the family, globalization, human rights, popular culture, race and racism, reproduction, science, the self, sex work, and sexuality. The fallacy on which modern feminism is based is that men have more power than women. Among mammals, the female always has more power than the male, and humans are no exception. It is true that, in all human societies, men largely control all the money, politics, and prestige. They do, because they have to, in order to impress women. Women dont control these resources, because they dont have to.
