Excerpt: . . . the-shelf system shall be purchased or procured without the assurance that spectrum supportability has been or 25 can be obtained. In order to ensure that this guidance is followed, acquisition processes added required steps to address the allocation of spectrum for a system in design or development (fig. 2). Necessary work to obtain spectrum supportability should be started as early as possible and occur during the technology-development phase of system 26 acquisition. Other steps prevent a system from going into the development and demonstration phase or the produc-tion and deployment phase unless it has a spectrum-supportability determination completed or a waiver granted by increasingly higher levels of government acquisition of-27 ficials. DOD guidance also requires systems purchased off the shelf or through other-than-normal acquisition processes to have a spectrum-supportability determination be-28 fore they are acquired. This process is made more dif-ficult because most systems are designed within the United States and meet US requirements, but there is normally no way to predict where the systems may be used outside 29 the United States. These potential limitations of spectrum availability and use in other countries must be consider-ations during the development and purchase of systems, 30 including UASes. Operations of Unmanned Aircraft Systems Citing an agreed-upon definition of the terms in use will ensure common understanding in the discussions to follow. Joint Publication (JP)-02, Department of Defense Diction ary of Military and Associated Terms, defines an unmanned aircraft as an aircraft or balloon that does not carry a hu-man operator and is capable of flight under remote control or...
