

Risk-Neutral Valuation

By Bingham, Nicholas H. / Kiesel, Rüdiger

Book Condition: New. Publisher/Verlag: Springer, Berlin | Pricing and Hedging of Financial Derivatives | This second edition - completely up to date with new exercises - provides a comprehensive and self-contained treatment of the probabilistic theory behind the risk-neutral valuation principle and its application to the pricing and hedging of financial derivatives. On the probabilistic side, both discrete- and continuous-time stochastic processes are treated, with special emphasis on martingale theory, stochastic integration and change-of-measure techniques. Based on firm probabilistic foundations, general properties of discrete- and continuous-time financial market models are discussed. | Contents Preface to the Second Edition Preface to the First Edition 1.
