A Synopsis of the Elements of Astronomy, and a Description of the Celestial Indicator: Written to Accompany the Apparatus, by the Inventor (Classic Reprint) (Paperback)

By Henry Bryant

Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from A Synopsis of the Elements of Astronomy, and a Description of the Celestial Indicator: Written to Accompany the Apparatus, by the Inventor Astronomy is the science which teaches the knowledge of the stars; a study that has at once the beauty of poetry, and the exactness of Geometry. Te look in all directions, on a clear evening, and we see a multitude of stars; were we to remain out all night, we should continue to see them coming up in the east, and going down in the west, until the dawn of morning obscured them from our sight. The sun rises; it is but a star, like those seen in the night and were it as far away from us as the other stars, we should continue to see stars all the time under a clear sky; but, being comparatively near us, it looks large and gives us a ?ood of light. That makes our day. Its distance is but miles, and its light but eight minutes in reaching us, while the light from the next near est fixed star, at...
