ROUTING PROTOCOL FOR MOBILE AD-HOC NETWORK

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | In recent years, the prevalence of Internet and technology has promoted communications as a major research area. A routing protocol is the act of moving information across an inter-network from a source to a destination. Routing directs forwarding by passing of packets from their source toward their ultimate destination through intermediary nodes. The routing process usually directs forwarding on the basis of routing tables within the routers, which maintain a record of...
