Excerpt from Foreign-Language and English Dictionaries in the Physical Sciences and Engineering: A Selected Bibliography 1952 to 1963 Subject analysis. This aspect presented minor problems. Some dictionaries have titles that are not self-explanatory or fully descriptive of their contents; a substantial number cover more than one major subject class and express such multiple coverage in the title; others comprise a whole range of subjects without expressing all of them in the main title. For the convenience of the reader, it was decided that dictionaries listing terms in two or three distinct technical fields would be entered under each major topic; those referring to more than three subjects would be printed under general and comprehensive designations such as Materials, Science, Technology.
