Farmers have found it more and more difficult to balance their expenses with milk checks and other sources of income. Long hours and tedious labor have in all too many cases made both ends meet only at the expense of soil fertility, fences, buildings, etc. There is no denying the fact that farming as a business has shown less and less of the margin of profit. At such a time research work assumes, in the eyes of those interested in future agricultural welfare, an aspect of almost desperate importance. Up on the Experiment Station devolves the responsibility for determining what methods may best decrease the cost of production and so make possible a greater margin of profit. Improvements in seed and breeding stock, control of plant diseases and insect pests, tests of new and old varieties under New Hampshire conditions, the determination of the best combinations of soil and fertilizer, analyses of brands, etc., have a direct bearing on this problem; and the use of information of this type has come to mean almost the difference between success and failure in farming. Through the extension service, as well as through bulletins and newspapers, it is now possible to carry quickly the results of research work at the Experiment Station into practice in the state at large. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic...
