

## Theory of Life

By Abder-Rahim Biad

lulu.com. Paperback. Condition: New. 152 pages. Dimensions: 9.0in. x 6.0in. x 0.4in. A new perspective on life that has not been explored; it offers a way to cure terminal diseases and prolong life beyond 100 years. The human body is similar to an electronic system with parts that only function when proper electronic principles are followed. Rejuvenating dead cells and restoring them to functionality can only be accomplished by channeling neural energy to ailing cells that need energizing and stimulation. Medical researchers are waiting for the cure to come from laboratories and the promise of stem cells, but the cure is in the brain itself. The brain can only be understood by a good background in physics and electronics. Working with the human body on a microscopic level has been ignored by medical researchers; because they lacked a thorough understanding of the human body electrical functions. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.
