Most people would not practice contraception, if they do not achieve their preference, which in a way may become an impediment to the National policy on population for sustainable development. The books has captured how the rural Hausa community expressed their preference for either having a son or a daughter, with preference for boys taking higher lead, then preference for sex mix is expressed after achieving main sex preference. The book recommends inclusion of sex preference in the analysis of Nigerian Demographic Health Surveys, so as to capture actual fertility behaviour. 128 pp. Englisch.
