paperback. Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Paperback. Pages Number: 330 Publisher: Shandong Science and Technology Press Pub. Date :2009-08-01. This book is the latest development of the Ministry of Education. Vocational Education and circuits and electrical technology. teaching basic requirements for the realization of employment-oriented to the needs of society as the goal of higher vocational education and training objectives and write this book systematically introduces the basic concepts of electrical technology. basic theory. basic methods and their application in practice. mainly including the basic concepts and laws of the circuit. resistor circuit analysis and theorems. sinusoidal steady state circuit analysis. three-phase AC circuit. coupled inductors and ideal transformers. a first-order transient circuit analysis. magnetic circuit and transformers. AC motor. relay contactor with low voltage electrical control systems. electrical tools and instruments used to use this book as a vocational mechatronics. electronics. electrical technology. telecommunications and other professional courses of professional training materials. is also available in electrical technology. engineering and technical personnel reference. Contents: Chapter 1 the basic concepts and laws of the circuit the first circuit and a circuit model of Section 2 circuit variable circuit element model in Section 3 Section 4 Section 5 Kirchhoff s law calculation of potential energy-saving bit and experiment Summary Exercise 1 Chapter 2 resistor circuit analysis and theorems in Section 1 the equivalent circuit analysis of Section 2 general analysis of resistive circuits circuit theorems in Section 3 Summary Chapter 3. Problem 2 experiments sinusoidal steady state circuit analysis in Section 1 the amount of the basic concepts of sine Section 2 sine amount of representation in Section 3 analyzes the basic components of the first exchange 4 sinusoidal steady state circuit analysis of Section 5 power...
