Brand New Book ***** Print on Demand *****.Is time-travel one of the unanswered questions of physics or philosophy? In metaphysics, the question doesn't even exist, in physics, perhaps. Relativity of the Half-Being of Representation is the first proof of its kind of the non-existence of time travel. To achieve a logical feat of such scope, it instead concentrates on its discoveries of parallel worlds just as concrete as unattainability of time-travel, for a complete cosmological conception of time in general, reversing the question from the temporal concept to the earliest examples in metaphysics we can see on the problems of Being. Astoundingly, the discovery ends on implications so wide, it ponders the limits of man controlling reality beyond every cosmological end.
