Forgotten Books. Paperback. Condition: New. This item is printed on demand. 104 pages. Dimensions: 9.0in. x 6.0in. x 0.2in. Excerpt from Outlines of Psychology This little book does not pretend to be a treatise upon psychology, but an outline of principles logically arranged so that the student of psychology and of the theory of teaching may use it as a guide-book in directing his investigations upon this subject. Definitions and principles are not here extensively elucidated, but the facts of the science are plainly stated in their relation, to each other, with ample suggestions to the student who desires to make further investigations. It has been the aim of the author to incorporate the cardinal principles that underlie all empirical psychology, and to show the inseparable relationship existing between these principles and the successful practice of the teacher. As science is knowledge properly classified, it has been the aim of the author to show the co-ordination and subordination of every topic, suggesting also the order in which each should be studied. That there is a philosophy of education is now generally admitted, though not universally. The application of universal principles to teaching is based upon such a philosophy. To aid the young teacher to discover and realize that psychology is not an isolated science, the author has appended other outlines and suggestive articles showing the application of psychological principles.
