PIGEON GUIDED MISSILES

History Press, 2011. Condition: New. The pioneering behaviourist BF Skinner was able to demonstrate in the 1940s that conditioning pigeons, housed in the nose of a missile, to peck repeatedly at an image of a target, could be an effective weapons guidance system. As with all the apparently hare-brained schemes in this book, including Thomas Edison's concrete furniture, Wilhelm Reich's cloud-busting machine and British Rail's flying saucer, the system was never adopted.

Reviews

This book is really gripping and interesting. Better then never, though i am quite late in start reading this one. Its been developed in an exceedingly easy way which is only right after i finished reading this ebook where basically modified me, alter the way i really believe.
