

## Design and Development of a Cpci-Based Electronics Package for Space Station Experiments

Filesize: 8.62 MB

### **Reviews**

*These types of book is the greatest ebook readily available. I was able to comprehended every little thing using this published e pdf. I realized this pdf from my dad and i encouraged this publication to discover.*  
*(Dr. Porter Mitchell)*

## DESIGN AND DEVELOPMENT OF A CPCI-BASED ELECTRONICS PACKAGE FOR SPACE STATION EXPERIMENTS

To download **Design and Development of a Cpci-Based Electronics Package for Space Station Experiments** eBook, remember to follow the web link below and download the file or gain access to other information which are have conjunction with DESIGN AND DEVELOPMENT OF A CPCI-BASED ELECTRONICS PACKAGE FOR SPACE STATION EXPERIMENTS ebook.

BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 24 pages. Dimensions: 9.7in. x 7.4in. x 0.1in.The NASA John H. Glenn Research Center is developing a Compact-PCI (CPCI) based electronics package for controlling space experiment hardware on the International Space Station. Goals of this effort include an easily modified, modular design that allows for changes in experiment requirements. Unique aspects of the experiment package include a flexible circuit used for internal interconnections and a separate enclosure (box in a box) for controlling 1 kW of power for experiment fuel heating requirements. This electronics package was developed as part of the FEANICS (Flow Enclosure Accommodating Novel Investigations in Combustion of Solids) mini-facility which is part of the Fluids and Combustion Facility s Combustion Integrated Rack (CIR). The CIR will be the platform for future microgravity combustion experiments and will reside on the Destiny Module of the International Space Station (ISS). The FEANICS mini-facility will be the primary means for conducting solid fuel combustion experiments in the CIR on ISS. The main focus of many of these solid combustion experiments will be to conduct applied scientific investigations in fire-safety to support NASA s future space missions. A description of the electronics package and the results of functional testing are the subjects of this report. The report concludes that the use of innovative packaging methods combined with readily available COTS hardware can provide a modular electronics package which is easily modified for changing experiment requirements. This item ships from La Vergne, TN. Paperback.
