Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Green s Function Techniques for the Solution of Time-Dependant Potential Flows With a Free Surface in a Bounded Domain In this report we consider the following two-dimensional potential flow problem: One or several platforms are floating in a channel; the platforms and the channel are assumed to be infinitely long in the y-direction and to have a uniform and bounded x - z cross - section.f9. The fluid is initially at rest and its motion is generated by the excitation of the confining boundary or the platforms. We assume both the motions of the fluid and the platforms to be small and we approximate the problem by using the two-dimensional transient linear wave theory. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
