

A theoretical approach to cognitive visualisation of musical sounds in graphic images

By Daisuke Matsumoto

GRIN Publishing Aug 2014, 2014. Taschenbuch. Condition: Neu. Neuware - Master's Thesis from the year 2014 in the subject Art - Visual artists, Cyprus International University, language: English, abstract: The purpose of this study was to find out the possibility of visualising musical sounds in graphic images from an objective viewpoint. In an opposition to the dominant methodological approach to human cognition of the last century, the study initially rejected an idealistic approach by mainly focusing on literatures from the field of cognitive neuroscience. Moreover, in order to discard a realist viewpoint that is the overt dialectic counterpart of idealistic subjectivity, it was shown through the analysis of formal elements of visual arts and music that there was no legitimate materialist connection between them. Nevertheless, although visual arts and music are materialistically antagonistic, human cognitive process of them elucidated important connections of visual arts and music cognition, which were motion and emotion. It was suggested that, considering the three main strata of human cognitive system, motion could connect cognition of visual arts and music in bottom-up processing of sensory stimuli, whereas emotion could connect them in top-down processing of sensory stimuli. In order to elicit musical cognitive experience in an...
